PROMOTION FOR NEW CLIENTS

- We are able to accept the minimum order quantity of 1,000 units for new customers (depending on the products. Please refer to the appendix for more details on minimum order quantity for different items).
- COSMEDIQUE retains even a separate small manufacturing system and a container label printing room to facilitate a small quantity turn-key manufacturing. We have started this sales promotion to ensure co-growth and co-prosperity with our new customers launching new businesses. We are committed to build and maintain a confident and long-lasting relationship with our customers.
- The average minimum order quantity for each item is 5,000. Please note that the order amount of less than 5,000 is most likely to increase the price and to limit the type of containers available due to lower production efficiency.

SKIN-CARE

OEM PROCESS

DESIGN PROCESS

HOW IT WORKS?

STEP 2

Make a decision on your product name and select some target designs

※ Logo must be provided by the customer (Ai file only)

STEP 4

Confirm the design and provide us the rest content (If needed) for both container and box (ex. The company info, How to use, product's featured etc.)

STEP 1

Select your desired container (Can be supplied by the customer)

STEP 3

Receive the first design proposal and request a modification

STEP 5

Final full design (Both Container & Package) Confirmation & Print process

FAQ DO YOU HAVE SOME QUESTION?

How can I request for samples?

If you send us your inquiry for samples with detailed information, we will send you a price quote based on the order quantity. We are able to provide you with samples upon completion of an initial agreement on the quantity and price. We kindly ask for your understanding that we charge 10% deposit for new customers or small quantity orders due to explosive requests for free samples during the promotion period.

What is the cost for designing work?

The cost for design is \$500 per product, including its container and box. You may get a discount if you order multiple products with the same design concept.

FAQ DO YOU HAVE SOME QUESTION?

How long does it take to have products delivered?

We are usually able to deliver our products within 15 days upon receipt of confirmation and approval of samples. A typical new product development period is 4 to 6 weeks but the actual development period varies depending on customers.

What type of containers are available?

We have a large number of suppliers in Korea and thus are able to provide practically all types of containers if your order meets our MOQ requirement. If you send us a picture of container you wish to produce, we will check if it can be manufactured. Please note that the style and color of available containers are limited for small quantity orders. Please, visit our website and go to PORTFOLIO > Cosmedique Products > CONTAINERS for more details. If you can't find the container you want, please contact us for inquiries by email.
